

NUTRIMMUNE Call

Frequently Asked Questions (FAQ)

Publishing date: March 11th, 2022

1. What is the scope of the call in relation to diet-related metabolic diseases?

The focus is on **common** diet-related metabolic diseases. Obesity and diabetes type 2 are mentioned specifically in the call text, but it is possible to also include other **common** diet-related metabolic diseases e.g.:

- the collection of conditions included in the metabolic syndrome (cardiometabolic) and cardiovascular disease
- non-alcoholic fatty liver disease

2. Which diseases are outside the scope of the call?

The following are outside the scope of the call:

- inflammatory bowel diseases
- rare diet-related metabolic diseases (e.g. niacin deficiency)
